Professional Summary

Technical professional with 4.5+ years of experience in software development and team coordination, specializing in backend systems, scalable APIs, and engineering team management. Experienced in leading development teams, mentoring junior engineers, coordinating cross-functional projects, and delivering scalable software solutions using Laravel, Node.js, and modern DevOps practices.

Professional Experience

Backend Engineer / Technical Team Lead – APIMIO & Freelance Projects (Jun 2022 – Present)

- Led backend development initiatives while coordinating developers to deliver scalable web applications and APIs.
- Managed task planning, code reviews, and development workflows improving productivity and code quality.
- Designed backend systems in Laravel and Node.js reducing API response time by 35%.
- Oversaw development of admin platforms managing 50+ vendors and 500+ retailers.
- Mentored junior developers on architecture, API design, and engineering best practices.
- Implemented CI/CD pipelines using Docker, Jenkins, and GitHub Actions reducing deployment time by 70%.
- Refactored legacy monolithic systems into modular API-first architectures.
- Integrated enterprise services including QuickBooks and Trimble Maps APIs.

IT Intern – Greybeard (Mar 2022 – Jun 2022)

- Supported organizational documentation and compliance initiatives for ISO 27001 certification.
- Coordinated with HR, IT, Procurement, and Accounting departments for compliance readiness.
- Produced 60+ policy and process documents contributing to successful ISO certification.

Key Projects

OOber Platform – Led development planning for modules including vendor management, product sharing, onboarding, and dashboards while migrating the platform to a modular API-first architecture.

FleetLegend (Keystone) – Led backend development for a fleet management system handling thousands of vehicles and routes while integrating logistics and financial automation systems.

Mausam Dashboard – Re-engineered backend infrastructure and optimized SQL performance improving API response times by 25%.

Education

BS Software Engineering

COMSATS University Islamabad (2018 – 2022)

Final Year Project: Acumen Expression & Behavior Detection using Google AI

Leadership Experience

Vice President – Computer Science Society, COMSATS University

Organized technical events, coordinated student teams, and supported academic initiatives.

Core Skills

Management: Team Leadership, Project Coordination, Agile Development, Stakeholder Communication, Mentorship

Technical: Laravel, Node.js, REST APIs, Microservices, CI/CD, Docker, Jenkins

Databases: MySQL, PostgreSQL, MongoDB

Tools: Git, Bitbucket, Jira, ClickUp, Postman, Figma, QuickBooks API, Trimble Maps API, AWS (basic)
